

# OES NATIONAL REGISTRY

Congratulations on being accepted as a CMS Qualified Clinical Data Registry for the 2018 performance period of MIPS. We are pleased to announce that the 2018 PIMMS MIPS Qualified Clinical Data Registry Qualified Posting and Qualified Registry Qualified Posting are live. The postings are located on the CMS QPP Program 2018 Resources site (<https://www.cms.gov/Medicare/Quality-Payment-Program/Resource-Library/2018-Resources.html>). Please know that the 2018 specifications for the Quality measures and Advancing Care Information measures, as well as an Improvement Activities Fact Sheet, have also been posted in this location.

Each Qualified Clinical Data Registry is assigned a unique vendor ID that must be used when submitting data to CMS. The unique vendor ID number that has been assigned to **Outpatient Endovascular and Interventional Society National Registry** is **7689991**. Please document this number or retain this email for future reference.

Please know that organizations participating as a Qualified Registry and a Qualified Clinical Data Registry will receive a unique vendor ID for each vendor type.

In addition, the final QCDR measure specifications including the measure IDs is attached for your records. These measure IDs must be used when submitting measure data to CMS. Please retain this spreadsheet to ensure that measure data is submitted with the correct measure IDs.

**Next Steps:** As defined by the Quality Payment Program Final Rule, the "QCDR must publicly post the measure specifications (no later than 15 days following our approval of these measure specifications) for each non-MIPS quality measure it intends to submit for MIPS. The QCDR may use any public format it prefers. Immediately following posting of the QCDR measures specification information, the QCDR must provide CMS with the link to where this information is posted." (81 FR 77375). Please post your QCDR measure specifications and provide the link to where this information is posted as a

comment under your 2018 self-nomination form in JIRA-by 5pm ET on Monday, January 15, 2018. Failure to post your approved 2018 QCDR measure specifications by the aforementioned deadline may result in your organization being placed on probation for the 2018 MIPS performance period.

Regards,

CMS and the PIMMS MIPS Team
